

At Glenelg Health Care we aim to support the community providing high quality medical care. Patient's Medicare rebate covers only part of the costs associated with providing care. We are a mixed billing practice, endeavouring to continue to bulk bill standard consults for existing eligible patients: children under the age of 16 and those with Pension and DVA gold cards. Patients who have a pension or health care card who have their first appointment after April 1st 2026 will be charged a reduced gap.

For those patients who do not hold Pension / Concession cards, the cost of the consult is paid in full on the day of the consult.

PLEASE NOTE: All new patients are allocated a double appointment to allow the doctor sufficient time to take a full medical history before addressing the patient's presenting issue. All patients over the age 18yrs will be charged a full private bill for this consult (no concessional rate).

Fees for Telehealth consultations are managed as a face to face consultation with fees being applied. To be eligible for a Telehealth consultation you must have seen the General Practitioner at the clinic within the last 12 months. (Children under 12 months of age are exempt.) If you have not had a face to face consultation in the 12 months prior to a telehealth consultation full fees will be charged. No Medicare rebate is available in this scenario. Telehealth consultation payments can be made via debit/credit card over the phone

NON CONCESSION PATIENTS

Consultation	MBS item number	Total Fee	Medicare Rebate	Gap Fee
